EU-Projekt Pro-EE Musterbeispiel LED

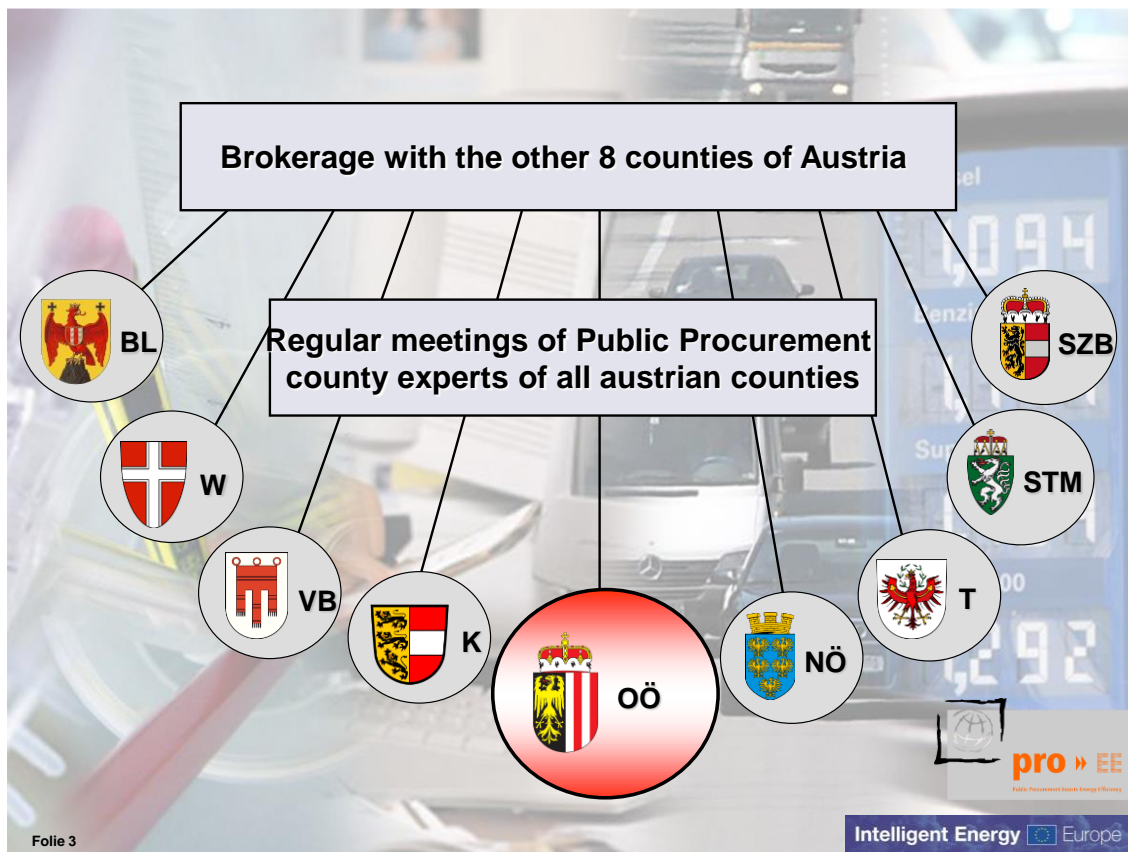

- Start in July 2006
  - **Brokerage to Public Procurers Over 200 customers have to buy their needed products within 26 procurement groups via the central managed conditions.** Common procurement activities with app. 20 government owned companies. Common procurement activities with all other 8 counties of Austria
  - **Brokerage to Start Ups, Incubators and Excelleraters via Governmental owned "Innovation Holding"**
- The main goal is to change the actual situation in the public procurement innovation business from doing innovativ projects by chance to set up innovative projects continuously and systematically.
- How the System functions:
1. Incubator and Excellerator suggest companies with their innovative products
  2. Innovation Broker situated in the central public procurement screens the different departements with their different needs and matches demand and offer.

- ## Concept of Fostering Innovation through Public Procurement in Upper Austria – Experimental Practice
1. Bridge to Innovation Holding (BizUp, Tech2B, Cluster,...)
  2. Inno-Scouts (within the governmental administration)
  3. Matchpoint-Meetings (Cluster and head of different departements)
  4. Innovation in building (pendant to culture in building)
  5. Special Award (best innovative public procurer and guarantee of ordercheck for awarded companies )
  6. Integration of this concept in the Main Innovation concept „Innovatives OÖ 2026“
  7. Evaluation and further developement of the concept
  8. Monitoring (convenient monitoring tool)
  9. Target of all actions – getting a reference order of the public procurer
